PROFESSIONAL SUMMARY

Technology professional with 4+ years of commercial experience delivering digital projects in large-scale regulated environments including Tata Consultancy Services and Plusnet, on products serving 800,000+ customers. Experienced across the full delivery lifecycle from requirements and definition through build, test, release and support, working in Agile teams alongside UX, design, content, product and engineering stakeholders. Has independently taken a product from concept to public release. A strong communicator with the technical background to work credibly with engineering teams, now looking to bring this breadth to technical delivery, development, data or digital transformation roles where both technical depth and clear communication make a real difference.

PROFESSIONAL EXPERIENCE

Independent 2026 - Present

Full-Stack Mobile Developer

- Architected and implemented relational data structures within Supabase and SQL, prioritising high data integrity, system scalability, and optimised query execution.
- Orchestrated the full end-to-end development lifecycle - design systems, UI/UX, business logic, and security - leveraging AI LLMs (Claude, ChatGPT, Copilot) to accelerate prototyping and production deployment.
- Engineered cross-platform iOS and Android solutions using React Native and Expo, using AI-assisted workflows to streamline code generation, research, and technical decision-making and reduce delivery timelines.

Tata Consultancy Services Apr 2023 - May 2026

Front-End Developer & AI-Assisted Engineer

- Delivered technical solutions across customer-facing products for Plusnet (800,000+ users), building pixel-accurate React and TypeScript interfaces compliant with WCAG 2.1 accessibility standards.
- Implemented and validated GA4 events and data layers, auditing tracking implementation to ensure precise measurement of customer journeys and conversion rates.
- Leveraged analytics findings and A/B test data to optimise customer journeys alongside UX, design, and product teams, delivering a 5-10% increase in journey completion speed.
- Introduced AI-assisted workflows using Claude, GitHub Copilot, and Amazon Q to automate boilerplate and test generation, cutting repetitive development effort by 30%.
- Translated business requirements and user stories into production-ready solutions, integrating with enterprise REST APIs within Git, Jenkins CI/CD, and Azure DevOps environments.
- Communicated technical outcomes to senior stakeholders, led team stand-ups, and mentored junior engineers, holding high standards through peer code reviews.

Etsy (self-employed) Nov 2025 - Feb 2026

E-Commerce Entrepreneur

- Operated a digital product store on Etsy, using Etsy and Facebook analytics to track sales performance and inform marketing decisions.
- Managed paid advertising across Facebook and Etsy and produced promotional content for TikTok and Instagram, measuring results and adjusting spend accordingly.

Plusnet Sep 2022 - Apr 2023

Front-End Developer

- Built and tested production interfaces across billing, upgrade and renewal customer journeys using React, JavaScript, HTML, CSS and SQL, writing unit tests with Jest and working with UX, content and product teams in an Agile environment.
- Designed and ran regular team survey questionnaires capturing how the team felt about each week - what went well, what they enjoyed, ideas for improvement and any concerns - feeding the results into retrospectives and ways-of-working improvements.
- Participated in daily stand-ups and regular pair-programming sessions, collaborating closely with other developers to maintain code quality and share knowledge.

CRM Developer

- Built Power BI reports and visualisations to give stakeholders visibility of business data and support decision making.
- Developed CRM solutions involving relational data models, workflow automation and structured business processes.
- Analysed business requirements and translated them into practical technical solutions, maintaining testing processes and audit trails in Azure DevOps.

CodeNation / IT Internships

Earlier

Additional Experience

- Student Software Developer at CodeNation - full-stack development with React, Node.js, Express.js, and MongoDB.
- IT internships at BBC MediaCity, Higher Openshaw Community School and Hyde High School - 1st-line support, hardware maintenance, component upgrades, and OS deployments.

EDUCATION

BSc (Hons) Web Development - 2:1 Manchester Metropolitan University

2017 - 2020

Web and Database Development | SQL | Python | Java | JavaScript | PHP | Analytics | Systems Thinking | UX Research | E-commerce | Business Strategy

Level 3 Extended Diploma in IT - 3 Distinction* Ashton Sixth Form

Data Modelling | Programming | Software Testing | IT Project Management | Cyber Security & Incident Management | Website Development | Cloud Storage & Collaboration Tools

CERTIFICATIONS

ISO 27001

Google Digital Marketing

Responsive Web Design

AI for Work

CORE SKILLS

- Data & Analytics:** SQL | Power BI | Relational data modelling | GA4 | Data layers | Data auditing | Reporting & visualisation | Digital measurement
- Solutions & Automation:** Workflow automation | REST APIs | System & tool integration | Process improvement | Requirements analysis | Proof of concept | CRM | n8n | Supabase
- Development:** JavaScript | TypeScript | React | React Native | HTML | CSS / SCSS | Node.js | Express.js | MongoDB
- Quality & Compliance:** Functional & UI testing | Defect investigation | Audit trails | Structured testing processes | ISO 27001 awareness
- Delivery:** Agile | Scrum | User stories | Stakeholder communication | Git | Jenkins | CI/CD | Azure DevOps
- AI & Automation:** Claude | GitHub Copilot | Amazon Q | LLM workflows | Prompt engineering
- Research methods:** Usability Testing | Heuristic Evaluation | Journey Mapping | Heatmaps | Card Sorting | SUS Surveys | A/B Testing | Competitor Analysis | UX Audits | User Flows | Personas
